Declaration:

Economic action and design is always associated with interventions in nature and the environment. We are committed to protect the environment, including preventing environmental pollution. From this we derive responsibility for Miles to continuously improve the environmental compatibility of our processes and to reduce the use of natural resources.

Environmental protection not only benefits natural resources, but also our company. That is why we strive for safe and environmentally and socially compatible solutions in our actions. The constant improvement of all processes in our company is an integral part of our company philosophy.

Due to the quality of our products and the reliability of our actions, we enjoy an excellent reputation among our business partners worldwide. This gives us far-reaching responsibility both towards our customers and towards our employees and society. The associated tasks, in particular compliance with environmental laws and regulations, as well as the continuous improvement of environmental protection, are perceived as an integral part of corporate policy in all areas of Miles. With the introduction of environmental management in accordance with ISO 14001, further prerequisites have been created to strengthen trust in Miles among customers, employees and suppliers as well as the social environment.
